## Clue

Frontend Engineer (*May 2019 - Present*)

Working on helloclue.com; a Gatsby site which is an encyclopedia for women's health. Responsible for maintaining/building (new) components to serve content from a Contentful GraphQL server. Built a Jenkins CI process that uses Lighthouse to check if a PR build increases/decreases page speed and performance.

Technologies: Gatsby, React, TypeScript, GraphQL, Docker.

## Flutterwave

Frontend Engineer (*Jan 2018 - May 2019*)

Built the V2 version of the payment checkout form which had improvements such as faster loading time (20x) and more payment channels. Worked on the merchants dashboard and was responsible for adding key features such as business analytics which provided an holistic overview for merchants. I also worked on a previous version of getbarter.co that was solely for virtual cards and corporates.

## Anakle

Web Developer (*May 2017 - Dec 2017*)

Worked on multiple landing pages for various clients. Built a lifestyle and youth centric magazine/blog for a top banking client. I also helped build a mobile app (using Ionic) for a FinTech Client.

## Education

**Covenant University, Nigeria** B.Eng Computer Engineering
